

# A brief tour of **AWX**

Alan B. Christie

achristie@informaticsmatters.com  
@alanbchristie

**A** **AWX:** -

- Provides a **web-based** user interface...
- With a **REST** API...
- and a **task engine**...
- That's built on top of **Ansible** (v2.8)...
- That's **Open** (Apache v2)

**A** ...is the upstream project for **RedHat's Ansible Tower**,  
a commercial derivative of AWX

**A** ...is containerised and installs easily in

- **Kubernetes**
- OpenShift
- Docker

**A** ... can be found at **<https://github.com/ansible/awx.git>**
